BERENDS GRADER BLADES

The 6' Medium Duty Hydraulic Model

By incorporating the versatility of the popular larger hydraulic grader blades into the popular Medium Duty model, Berends have provided an implement for the small to mid range tractors which is easy to use but with the strength and reliability to match Australian conditions.

- Hydraulic angle (3" x 12" ram) allows mouldboard to be angled at up to 45° in each direction from the tractor seat. Blade can also be reversed for back filling.
- Can be manually offset in seconds to work outside the tractor wheel to the left or right hand side. Maximum of 600mm offset
- Tilt position can be controlled either via a ratchet or optional hydraulics (2 ram model). Allows approximately 30° tilt in both directions. Additional holes for the lower linkage arms provide extra tilt for extreme V-draining.
- Diverter kits are available to allow 2 ram model to be used on tractors with a single set of remotes.
- Heavy duty hardened reversible cutting edges for maximum life.
- Optional pneumatic wheelkit available for depth control.
- 12 month warranty against faulty workmanship.

Offsets up to
600mm to
work outside
tractor wheel

Tilts up to
30° in both
directions

SPECIFICATIONS

Model (0414/0415)	MD Offset with Hyd angle/tilt
Cutting Width	6' (1.8m)
Mouldboard thickness	8mm
Mouldboard height	450mm
Tractor HP	30-60
No. offset positions	4
Nett Weight	240kg
