Kubota M7-2 SERIES

The M7-2 Series is Kubota's flagship – the most advanced tractor we've ever built. The M7-2 range now offers 12 models, each with a huge variety of customisable options.

Specifically designed for the farming professional who wants a versatile and hard-working tractor, the M7-2 is powered by a next-generation 6.1 litre, four-cylinder diesel engine, incorporating Kubota's clean-air technology and available in 130hp, 150hp or 175hp with boost and industry leading constant power and torque.

KUBOTA'S MOST POWERFUL ENGINE

130 to 175hp with boost and industry-leading constant power and torque

NEVER IN THE WRONG GEAR

Choice of 30-speed powershift or KVT variable driving to suit any operation

SIMPLE AND SOPHISTICATED

High-end components with electro-hydraulics, monitor control and GPS readiness in the premium models

BIG MUSCLE

9,400kg lift capacity, up to 110L/min hydraulic flow for all-round performance

GOOD CONNECTIONS

The M7-2 is a multitasking machine and caters for a myriad of implements through 4 PTO speeds, optional Front Linkage & PTO, up to 6 remote valves (depending on the model)

M7172 & SC1600CF SEEDING COMBINATION

M7152 & SD2351MP SEED DRILL

Kubota's strong focus on innovation allows us to provide a unique and broad Implements product range with high quality. Kubota Australia offers an extensive implement package aimed at the professional farming community right through to our lifestyle customers, covering the areas of Cultivation, Seeding, Spreading, Crop Care and Electronic Solutions for agricultural tractors and machinery. The Kubota Implements range of machines spans over 140 different models.

*Offer is available for business borrowers only. This 0.9% p.a. finance rate offer is only available with a minimum 20% deposit, 36 monthly repayments and minimum financed amount of \$4,000. NEW M5 ROPS

M5-1 ROPS PROFESSIONAL TRACTOR SERIES

KUBOTA DIESEL ENGINE

Features a 3.8l engine that produces 93 and 103hp on Standard and Narrow models at the economical engine speed of 2400rpm

MODEL CHOICE

Standard and narrow tractor models available

TRANSMISSION

6 synchronised gears in 3 ranges provide a wide choice of 18 speeds with all narrow models, featuring a dual speed splitter for a total of 36 speeds. Power shuttle ensures very smooth changes of direction and drive engagement

ROPS

"Advanced simplicity" takes centre stage in the operator station of our new M5-1 ROPS models. Flat floor design allows for easy movement of the driver when mounting or operating the tractor

Kubota[®] M5-1 SERIES

You can depend on the M5001 Series Standard Model tractors for outstanding performance and year-round comfort. The performance begins with a reliable and efficient Kubota engine that can power through even the toughest tasks with ease and speed. There's plenty of power for PTO-driven implements, as well as convenient electronic speed control to keep those implements operating at optimum efficiency. A fully synchronized transmission and an advanced hydraulic shuttle for shifting between forward and reverse, simplifies tractor operations.

STUBBLE CULTIVATION

Stubble cultivation is key to conservation tillage. It incorporates weeds and volunteer cereal seeds into the soil with an intensive mixing and promotes their germination for a more efficient follow-up treatment. The even incorporation of residues presents a key factor for seed germination. Therefore, Kubota has designed the CD range to comply with these requirements, but also to offer the farmer a versatile machine which is ready for both shallow and deeper cultivation.

CD2600T COMPACT DISCS

CD2350 W/SH200E SEED BOX

CD COMPACT DISCS

Robust Disc Arms and high capacity maintenance free bearings deliver excellent durability

Actipack Roller for clod crushing and very firm re-compaction of the soil

Available in 2m to 7m working widths

Easily adapted for heavy and sticky soil conditions

CU3351P TINE CULTIVATOR

CU TINE CULTIVATORS

The CU3001P, with a well-organised tine arrangement over 3 rows of tines, has been designed to ensure mixing and intensive cultivation even with long residues. The CU3001P has a maximum working depth of 350mm to bust hard pans and incorporate residues for moisture penetration and absorption. The high inter-row clearance of 750mm and the high underbeam clearance of 870mm ensure blockage-free operation under any conditions

SEEDBED PREPARATION

SEEDBED SATISFACTION AT ITS FINEST

PH2600F POWER HARROW & SH500H SEED BOX

PH1301 POWER HARROW

RM2005 - 4 FURROW PLOUGH

The Kubota Power Harrows are designed for heavy conditions and are built for tractors up to 400hp. Special emphasis has been given to reliability and a strong trough design. This has been achieved by having a large distance between the conical bearings, hardened gears in the trough, and a heavy-duty rigid trough design.

PH POWER HARROWS

PH Series Power Harrows are suited to small tractors right through to large tractors, up to 400 PTO hp

Self-supporting trough construction, as well as standard 'Quick-fit' tine holders

Conical bearings offer optimum performance

Working widths from 2.5m to 6m folding

A range of seeding options also available to suit Kubota Power Harrows

RM REVERSIBLE PLOUGHS

Smart auto-line system, plough pulls straight at any set working width. Guarantees easy pulling and reducing fuel consumption

Efficient non-stop system for quality ploughing in stony conditions

95% of a Kubota plough is heat treated and hardened for ultimate strength in Australia's harsh conditions

VARIOMAT enables quick hydraulic adjustments of the working width on the fly

SEED DRILLS

The SC1000 series compliments the product group of seed drills. The SC1000 series, available in 3.0m and 4.0m rigid and 4.0m and 6.0m folding to carry out seedbed preparation, levelling, reconsolidation, seeding and pressing all in one pass. The SC1000C is a grain and fertiliser version to apply either grain and fertiliser or, alternatively, two different sorts of seeds at the same time. This has been achieved by the divided hopper equipped with two metering devices.

IMPLEMENTS YOU CAN COUNT ON

ACROSS THE IMPLEMENTS RANGE

SC1300C SEEDING COMBINATION

SC SEEDING COMBINATION

SINGLE PASS

The SC seeding combination range can cultivate, seed and fertilise in a single pass

FAST DELIVERY

The SC is able to deliver fertiliser application rates up to 400kg/ha and 15km/h

WIDE WORKING WIDTH

The SC series comes in working widths of 3m, 4m and 6m

SD SEED DRILLS

SD Seed Drills come with an 1,100Ltr hopper with full ISOBUS control

The ELDOS metering device delivers high accuracy with its electronically controlled metering and 5 different seed rotors

Disc Openers and press wheels with 5" row spacing

Working widths from 3m through to 6m

Also lower spec price efficient seeding options available

PH2301 POWER HARROW & SD2301MP SEED DRILL

SPREADERS & PLANTERS

With the Kubota DSX-W GEOSPREAD you will get a perfect spreading result! The GEOSPREAD system does section control with sections of only 1 metre. With a maximum of 54 sections and the possibility to switch sections over the middle, unnecessary overlap is set to an absolute minimum. The 4 load cells and a reference sensor on the DSX-W GEOSPREAD are important features as with section control accurate weighing is essential.

EVEN SPREAD, EVEN BETTER RESULTS

DSXL-W GEOSPREAD

DS DISC SPREADERS

Full section control available on the GEOSPREAD models using 1m section widths

4 load cells (5 tonne per cell) and centralised reference sensor deliver unrivalled dosing accuracy

Easy setting of application rate for up to 54m spreading width

For small to large scale farm operations

Accurate and consistent spreading pattern

Capacity ranges from 700L to 4,575L

PP PRECISION PLANTERS

For all tillage and row crop establishment methods, Kubota offers proven technology

Today, precision farming has become more and more important. With GEOcontrol and GEOseed®, Kubota offers two applications for the PP Series that maximise the machine output and prevent double seeding

The PP Series is available with working widths from 3m to 6m with flexible adjustable row widths and a wide range of additional equipment

Up to 18km/h working speeds with the NEW SX High Speed Planter

PP1601TF-SX PRECISION PLANTER

SPARTAN RANGE

Great Plains Manufacturing based in Kansas, USA has been a market leader in seeding equipment since its inception in 1976. Acquired by Kubota in 2016, Great Plains continues to be a leading global manufacturer of seeding and tillage equipment. A respected market leader in grain drills but also recognised as an innovator in tillage equipment, fertilizer applicators and precision planters. Whether its vineyard seeders, specialist seed drills for fodder crops or precision planters, Great Plains has the right solution for your application.

ULTIMATE VERSATILITY. BUILT TOUGH

SPARTAN 6M & 9M NO-TILL DRILL

Triple disc row unit with Turbo coulters

6" or 7.5" row spacing

Double shoot as standard

Integrated blockage monitor system included

Individual row shut-off capability

3m Transport

INTEGRATED BLOCKAGE SENSORS AS STANDARD

The Great Plains Spartan range has the versatility you need in a compact package.

With up to 250kg of down pressure possible on each independently mounted Turbo coulters, the Spartan is a proven performer in tough no-till conditions.

NTA907-2

MECHANICAL SEED DRILLS

Working widths from 5ft (1.5m) to 20ft (6.1m)

Mounted, semi-mounted or trailed

Options for small seeds and dry fertilizer application

Double disc (min-till) or triple disc (no till)

Row spacing from 6" (152mm)

Individual depth adjustment on each row

Full length seed tube guides seed to the bottom of the seed trench ensuring accurate placement

1500 & CPH

TURBO-MAX - ULTIMATE RESIDUE MANAGEMENT

Turbo-Max blades are set 19cm apart on two rows of coulters gangs

Rear gangs offset the front gangs, splitting the blade spacing to 3.25" for superior residue sizing in one pass

Gang angle is hydraulically adjustable on-the-go from 0° to 6°, providing greater flexibility

Working widths from 3.0m to 14.6m with narrow 3m transport options

Cover crop establishment using the air Turbo-Seeder attachment

Designed with soil conservation in mind. Does not excessively work soil therefore avoiding soil erosion problems

15FT (4.6M) TURBO-MAX WITH TURBOSEEDER

MAX CHISEL VERTICAL TILLAGE

Available in work widths of 3.5m to 7.3m

Features a double row of 610mm discs with the patented Samurai Edge

Heavy-duty Toggle-trip reset shanks with 38cm-spaced shanks

Shank working depth up to 12" (305mm) and 1,111kg breakout

Heavy rear roller with active hydraulic down pressure provides an excellent finish in all conditions

Rear chopper reel finishing tool chops residue and smoothens finish

MC5319 MAX CHISEL - 19 SHANK, 7.3M TILLAGE WIDTH
