100 – 130 HP

MF 5700 S SERIES **THE ULTIMATE LOADER TRACTOR**

With its upgraded design, high performance driveline, great comfort and a wide choice of equipment options, the new MF 5700 S Series is designed to tackle big jobs on the farm quickly and efficiently.

- ▶ Powerful and economic 4 cylinder 4.4 litre AGCO Power engine
- ▶ Steep nose hood for exceptional visibility
- ▶ Unique multifunction joystick combining loader and transmission controls
- ▶ Dyna-4 and Dyna-6 semi powershift transmissions with brake to neutral as standard
- ▶ Top driver comfort with air suspension seat and mechanical cab suspension

130 – 175 HP

MF 6700 S SERIES **COMPACT PERFORMANCE**

The MF 6700 S Series introduces the latest in four-cylinder AGCO Power engine technology. It blends all the benefits of a four-cylinder machine – compact dimensions, low overall weight, excellent manoeuvrability – with the pulling, pushing and lifting power to match a comparable six-cylinder tractor.

- ▶ Up to 200 HP & 840Nm of torque with a large capacity 4 cylinder 4.9 litre AGCO Power engine
- ▶ Excellent manoeuvrability with a 4.8 m turning circle
- ▶ Two transmission choices – Dyna-6 & Dyna-VT
- ▶ Up to 190 l/min hydraulic flow
- ▶ 4 speed PTO as standard; 540/1000/540E/1000E

150 – 280 HP

MF 7700 S SERIES PURE EFFICIENCY

The MF 7700 S Series has been specifically designed to meet the needs of farming professionals. With a wide choice of power, transmissions, cab specifications, hydraulics and PTO options, the MF 7700 S Series can be adapted to your every demand, offering a custom built, practical, straightforward and dependable solution.

- ▶ Efficient drivelines with, Dyna-6 & Dyna-VT transmissions available and Engine Power Management on Dyna-VT models for more power when you need it most
- ▶ Ultimate comfort for a more productive working day with numerous features available for added convenience
- ▶ Up to 9,950 kg lift capacity

DATATRONIC 5 TERMINAL

The 9" touchscreen Datatronic 5 terminal for the MF 8700 S Series provides complete tractor & implement control and Auto-Guide™. Offering an advanced suite of features including; record keeping, mapping, automatic section control, variable rate applications and comprehensive machinery monitoring. Datatronic 5 will provide a more intuitive precision farming experience.

FUSE™ TECHNOLOGIES

INCREASE PRODUCTIVITY AND REDUCE COSTS.

FUSE
SMART FARMING. SYNCHRONIZED.

AUTO-GUIDE™

The Auto-Guide™ guidance offering for the S Series is flexible for customer requirements with the choice of either a Trimble or NovAtel receiver and a range of correction signals available for every operation.

FIELDSTAR 5

The 9" touchscreen Fieldstar 5 for MF 5700 S, MF 6700 S and MF 7700 S Series controls Auto-Guide™ and precision farming functions, including section and variable rate control, camera and ISOBUS control - offering a full range of solutions for the modern farmer.

DATA MANAGEMENT

With the value of data becoming more apparent, TaskDoc™ is the Fuse™ Technologies solution for data collection and management. Operators can now create work orders that log total area, time, fuel consumption and produce job reports with a Farm Management Information System (FMIS). Upgrading to TaskDoc™ Pro opens up a wireless data transfer to a range of FMISs, and GNSS information is collected to show coverage and as-applied maps.

IDEAL BALANCE™

IDEAL Balance technology is a completely new way to manage crop flow. Two specially molded grain pans collect crop material from the threshing and separation area and consistently deliver that crop to the cleaning shoe, regardless of crop or harvest conditions.

GRAIN HANDLING

With the industry's largest grain tank and class-leading 210 liters per second unloading speed, you'll spend less time unloading grain and more time harvesting.

AIRSENSE™

With AirSense, the engine always runs at optimal temperature, while blowing out the radiator manually is a thing of the past.

POWER TRANSMISSION

With simple gearboxes and fewer belts than other combines, the IDEAL offers a system designed to lead the industry in power-transfer efficiency and put muscle where the combine needs it the most.

IDEAL COMBINE

A NEW COMBINE FOR A NEW ERA.

- 392 - 647 HP
- 17,100 litre grain tank
- 210 l/second unloading rate

The future of harvesting has arrived with the IDEAL from Massey Ferguson. Featuring the latest technological innovations, the IDEAL is designed to increase harvesting capacity. It has full automation, low daily maintenance, high throughput, long gentle rotors for varying crop conditions and a large cabin for driver comfort. You could say Massey Ferguson has perfected harvesting, no wonder it's called IDEAL.

DUAL HELIX ROTORS

The IDEAL combine allows more space for a new threshing and separation rotor design that is gentler on the crop, both grain and straw. What's more, as compared to other systems, this dual helix processor requires 50% less power to operate.

IDEAL VISION™ CAB

Long, hard days seem all the shorter and more productive from the IDEAL combine's Vision Cab.

IDEALharvest™

No combine has ever monitored its own operations so exhaustively. Nor, via the use of that data, allowed its operator so much control.

TRAKRIDE™ & NARROW FRAME

The slimmest chassis offered in Australia & New Zealand is paired with a wide footprint and fast road speeds. That means exceptional maneuverability and less compaction for your operation.
