## UHH Series Rotary Hoe

The European designed COSMO Bully UHH Series Rotary Hoes are ideal for large scale domestic and commercial operations and working virgin ground. The multi speed gearbox (rated up to 140hp) is fixed to a robust and rigid main frame, constructed with box section reinforcing, so the implement can operate for prolonged periods of time in a range of soil types and conditions.

The COSMO Bully UHH Series produces a super fine finish. The spring loaded tailgate keeps soil inside and in contact with the blades until it is well pulverised. The multi speed gearbox allows

the operator to customise the rotor speed. The rotor design,  $\varnothing$  530mm from blade to blade, allows a large amount of soil to be worked without clogging up the chamber. And the speed blade configuration, a design where six (6) L shaped blades (per flange) are slightly staggered, reduces the tractor horsepower required.

The COSMO Bully UHH Series is suitable for a range of domestic and commercial horticultural and gardening applications including nurseries, vineyards and orchards.
